Examiner's Amendment

1. An Examiner's Amendment to the record appears below. Should the changes or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

Title

2. Pursuant to M.P.E.P. §606.01, this title has respectfully been changed to read as follows:

**-- METHOD AND APPARATUS FOR ACCESSING REMOTE STORAGE IN A
DISTRIBUTED STORAGE CLUSTER ARCHITECTURE USING CERTIFICATES--**

Reason for allowance

3. The following is the Examiner's statement of Reason for Allowance. This statement is not intended to necessarily state all the reasons for allowance or all the details why claims are allowed, nor it specifically or impliedly state that all the reasons for allowance are set forth. The primary, or important reason for allowance of the claims is the inclusion of the limitation(s) in all the claims, which is not found in the prior art references.

In this case, the prior art of record teaches the claimed invention substantially as claimed, including a storage system accessible by a client over the network including an authentication procedure involving comparing a first certificate with a second certificate, however fails to teach individually or in combination: authenticating an access request, by particularly determining whether a first certificate obtained from the access request matches a second certificate, wherein the second certificate is calculated from an "encoded request" also obtained from the access request, the encoded request being explicitly defined by the invention's disclosure (page 17), this authentication process being at least described on pages 23-24 of invention's disclosure. This determination method step as interpreted from the claim limitations in light of the specification (MPEP 2111), as set forth on at least on independent claims 19 and 27 is not found to be taught by the prior art of record. Claims are allowed because of the combination of other limitations and the limitation listed above.

4. Claims 19-34 are allowed because of the combinations of other limitations and the limitation listed above.

5. Double patent analysis has been performed with respect to *issued patents* having common relationship of inventorship and/or ownership with respect to the above-allowed claims, *none* are found to warrant a double patenting rejection.

6. Any comments Applicants considers necessary must be submitted no later than the payment of the Issue Fee and to avoid processing delays, should preferable accompany the Issue Fees. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance". In event of any post-allowance papers (e.g. IDS, 312 amendment, petition, etc.), Applicant is exhorted to mail papers to the Production Control branch in Publications or faxed to post-allowance papers correspondence branch at (703) 308-5864 to expedite issuing process or call PUB's Customer Service if any questions at (703) 305-8497.
